Policy statement on green campus

Kakasaheb Chavan College, Talmaavale reserve the right to modify the policy form time to time

Introduction:

The world is facing serious environmental issue today. Report from World health organisation IPCC, and different nation and international organisation highlight the environmental issue which are most sensitive and widely discuss the issues in the world.

Swami Vivekananda Shikshan Sanstha's Kakasaheb Chavan College, Talmaavale is following defferent green practices which are in line with the vision and mission statement of the parent institute as well as the college. The college is committed to take lead role and create its own identity in protection and conservation of environment.

objective of this policy:

- To adopt practices to Turn the campus into the green and eco-friendly
- To be a self-sufficient in water by adapting watershed management and rooftop rainwater harvesting system

To Undertaker plantation drive of local and endmic plant species in the campus and outside the campus

- To update the demo projects like vermicomposting
- To involve student, faculty and stakeholders in the green practices of the college
- To conduct a green and green and energy audit of the college campus focusing on greening indicators like consumption of energy in terms of electricity and fossil fuel, solid and liquid waste management, etc.
- E-waste management, maintenance of green canopy in college etc.

The scope of the policy:

The college is situated in Karad-debewadi road. There is one layer of tree canopy between talmavale-kumbhargaoon road and college campus compound. The clean and green campus policies will incorporate co-curricular and extracurricular practice that will encourage the student to take lead in creating positive change. The focus area are follow:

- Clean and green campus initiatives like tree plantation activities
- Waste management process
- E-waste management process
- Rain water harvesting
- Alternative energy source utilization
- Landscaping in campus
- Ban on use of plastic
- No smoking, No tobacco in campus
- Green audit
- Energy audit
- Restricted entry of automobile in campus

The practices:

Thus in view of the policy, the concerned committee will be plan the executed to:

- Establish a green campus environment awareness campaigns
- Organise awareness program for the students, faculty and society
- Plan to save energy at the institute

- Phase out connection light source and get them replaced by the led bulbs
- Conduct of an annual green environment and energy audits
- Turn off unnecessary lights and use daylight instead
- Keep lights off in conference rooms, classrooms, lecture hall when they are not in use
- The institute will make all the necessary efforts to involve the students, faculty and staff in “green campus initiatives” by designating the volunteers of environmental task force, NSS cadets printing caps with green campus initiative slogan specially designed for the purpose.

Acknowledgement

The Energy and specifically electrical energy is the cleanest source of energy and getting utilized to the highest extent due to flexibility and effective utilization. Conservation of energy does not mean to limit the use of energy but to use it most effectively, efficiently and optimally.

The purpose of preliminary energy audit is to confirm whether the energy is used effectively, efficiently and optimally. Another focus is to identify the areas of Energy Conservation and to suggest measures to conserve the same.

The initiative of Shri Swami Vivekananda Shikshan Sanstha, Kolhapur's Kakasaheb Chavan College, Talmavale Tal. Patan, Dist. Satara – 415103, towards Carrying out Energy Audit is deeply appreciated and is indicative of institute's keen attention towards conservation of energy.

The Energy Audit team of Karmaveer Bhaurao Patil Polytechnic, Varye, Satara, is thankful to the Principal Dr. Arun Gade, Dr. Bhise S.M., Prof. Supugade, Prof. Pujari N.K., Shri Doudamuni R.B., Mr. Sapkal M.T. Shri. Jadhav A.V. of Shri Swami Vivekananda Shikshan Sanstha, Kolhapur's Kakasaheb Chavan College, Talmavale Tal. Patan, Dist. Satara – 415103, the faculty and staff members for the cooperation.

23/10/2023

Rayat Shikshan Sanstha's

Karmaveer Bhaurao Patil Polytechnic,

Varye - Satara-415015

Executive Summary

The preliminary energy audit report is submitted of the various electrical installations of various locations, laboratories of **Shri Swami Vivekananda Shikshan Sanstha, Kolhapur's Kakasaheb Chavan College, Talmavale Tal. Patan, Dist. Satara – 415103**, a premier College in Patan area of Satara District.

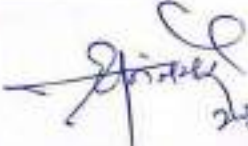

The major and most of energy utilization is in the form of electrical energy and hence audit of electrical energy is primary consideration.

The objective of this audit is to assess primarily the electrical installations in the institute buildings, campus and suggest energy conservation majors. The electrical installations of this institute had not been assessed for its electrical power utilization since 2018.

During this preliminary energy audit, electrical equipments, laboratory equipments and lighting systems are reviewed on 05/10/2023.

Summary of observations and recommendations

1. The energy audit conducted is a preliminary energy audit.
2. Electrical power utilization is mainly for lighting and utilities.
3. The monthly energy bill of institute can be reduced with revision tariff & especially having three phase connection for entire college & revision arrangement with MSEDCL.
4. The institute is educational institute and the laboratory equipment usage is dependent on usage by students. The computed energy usage 8853 KWh in 2018-19, 6811 KWh in 2019-20, 6075 KWh in 2020-21, 4807 KWh in 2021-22 & 6195 KWh in 2022-23. The average billed consumption is 738 KWh per month for the year 2018-19. The average per month consumption noted during 2019-20 to 2021-22 varies between 568 KWh, 506 to 401 KWh. The post Covid average per month energy consumption is 516 KWh.
5. **All four single phase supplies need to be converted into a Single three phase Electrical Connection & then Load on three phases should be balanced.**
6. **Earthing at all panels, equipments should be as per ISI & IES. It is recommended to check earth to neutral voltage frequently & accordingly earth points be treated to improve earthing.**
7. **Institute had a single phase 10KVA , DG set having model no. D8161292/1102249 model EA16, which is used at the time of supply failure to main building. Log book needs to be maintained properly.**
8. Detailed electrical schematic diagram should be prepared with load details, to enable further detailed audit.
9. Electrical power distribution panel room must be clean & should be easily accessible to cut of power in case of emergency.
10. UPS battery need to maintain appropriately and must be properly ventilated. Regular maintenance of batteries is must.
11. Stacking of wastage in control panel room should be avoided.
12. UPS batteries please be recycled properly. Regular maintenance of batteries is must to improve healthy condition of the computer & allied peripherals.
13. Institution name board be illuminated using 50W LED (at least Two Nos.) flood lights

23/10/2028

1. Introduction

Objective of Audit

Kakasaheb Chavan College, Talmavale was established in 1969 by Shri Swami Vivekananda Shikshan Sanstha, Kolhapur founded by great educationist Dr. Bapuji Salunkhe with a motto – “Dissemination of Education for Knowledge, Science and Culture.” College is located in the remote, rural and hilly area having pleasant and healthy atmosphere.

College offers a wide range of conventional program options in B.A., B. Com & B.Sc. courses. In addition, college runs B.A., B. Com. program through distance mode Yashwantrao Chavan Open University (YCMOU), Nasik. It also runs M.A. M. Com program through Shivaji University’s Distance and Online Education.

The College provides free Wi-Fi, Internet access and other teaching-learning resources to the students and teachers. The College has central library fully computerized with OPAC system and provides INFLIBNET in order to have benefit of e-resources.

The College has potential and scope of sustainable growth.

Description of facility, building Audited

The institute is located within the Campus of over the area of 23 acres.

Total built up area occupied is 2444 sq. meter (built up area is 26297 sq. ft.) by various academic departments, library, administrative building etc.

Scope of Audit

The scope of this Energy Audit is limited to preliminary energy audit with the intention to identify possible opportunities for revision and modifications to improve energy efficiency, pertaining to electrical power utilization. Major energy used is electrical energy for lighting, equipments, computers, etc.

2. Methodology and Instrumentation

Electrical energy data for last Five years is submitted by the institute and is verified locally.

Ratings of lighting system, equipments and installations are verified and confirmed with Volt Amp meters, Digital Power Analyzer wherever necessary.

Available data is further analyzed to find out the discrepancies and opportunities to improve performance and effective utilization of electrical energy.

3. Observations

- The institute is visited by Prof. Dr. Dhananjay Devi & Prof. Dr. Dilip Aldar on 05/10/2023.
- Representative of institute **Dr. Bhise S.M., Prof. Supugade, Prof. Pujari N.K., Shri Doudamuni R.B., Mr. Sapkal M.T. Shri. Jadhav A.V.** of **Shri Swami Vivekananda Shikshan Sanstha, Kolhapur's Kakasaheb Chavan College, Talmavale Tal. Patan, Dist. Satara – 415103** and concerned staff were present during physical inspection.
- The Institute is an educational institute.
- Major electrical power is available through four single phase LT connection from MSEDCL.

Consumer number	Tariff Duty	Date of connection
198810022188	073-07 (Single Phase)	16/0/1980
198810021246	90-01 (Single Phase)	11/11/1975
198810021939	090-01 (Single Phase	17/04/1979
198810022480	090-01 (Single Phase)	25/04/1984

Details of the Electrical Energy Consumption as per received data is as under

Year	Total Units consumed No. of Units	Amount Paid	Avg. Monthly Units	Per Unit Charges Paid Rs.	Data / Bills received
2018-19	8853	133940	738	15.13	Consumer Personal Ledger of all four meters
2019-20	6811	78343	568	11.50	
2020-21	6075	124411	506	20.48	
2021-22	4807	79355	401	16.51	
2022-23	6195	62572	516	10.10	

- The computed energy usage 8853 KWh in 2018-19, 6811 KWh in 2019-20, 6075 KWh in 2020-21, 4807 KWh in 2021-22 & 6195 KWh in 2022-23. The average billed consumption is 738 KWh per month for the year 2018-19. The average per month consumption noted during 2019-20 to 2021-22 varies between 568 KWh, 506 to 401 KWh. The post Covid average per month energy consumption is 516 KWh.
- No reliable measurements are available of Earth resistance at each earth point (measured in summer). We have conducted readings at Office, UPS , Server PPC point, Cooler Point, Computer Laboratory, Research room etc. However potential difference between neutral and earth point is noted to be less than 5 Volts at few points but it is more than accepted value at major places which is very objectionable .
- It is noted that the Voltage between Neutral Earth is very high at various places e which may lead to frequent maintenance of the electrical & electronics parts.
- Incoming electrical power distribution is through four Single phase supplies where energy meter terminals are not earthed properly

- Laboratory equipments are used as per requirements of students and its usage is not available.
- Air conditioning units are installed at principal cabin .
- Schematic of Electrical power distribution, control, protections and load connections is not available.
- The UPS/ Invertor Units are observed to be operational. Battery maintenance log book is not observed. .
- Institute has provided RO filter facility for drinking water. The filter maintenance log book is not observed. .

4. Conclusion & Recommendations

1. The energy audit conducted is a preliminary energy audit.
2. Electrical power utilization is mainly for lighting and utilities.
3. The monthly energy bill of institute can be reduced with revision tariff revision arrangement with MSSEDCL.
4. The institute is educational institute and the laboratory equipment usage is dependent on usage by students. The computed energy usage 8853 KWh in 2018-19, 6811 KWh in 2019-20, 6075 KWh in 2020-21, 4807 KWh in 2021-22 & 6195 KWh in 2022-23. The average billed consumption is 738 KWh per month for the year 2018-19. The average per month consumption noted during 2019-20 to 2021-22 varies between 568 KWh, 506 to 401 KWh. The post Covid average per month energy consumption is 516 KWh.
5. **All four single phase supplies need to be converted into a Single three phase Electrical Connection & then Load on three phases should be balanced.**
6. **Earthing at all panels, equipments should be as per ISI & IES. It is recommended to check earth to neutral voltage frequently & accordingly earth points be treated to improve earthing. Earthing pits are not connected & where connected are of inferior quality & wire gauge.**
7. **Institute had a single phase 10KVA , DG set having model no. D8161292/1102249 model EA16, which is used at the time of supply failure to main building. Log book needs to be maintained properly**
8. Detailed electrical schematic diagram should be prepared with load details, to enable further detailed audit.
9. Electrical power distribution panel room must be clean & should be easily accessible to cut of power in case of emergency.
10. UPS batteries need to be maintained appropriately and must be properly ventilated. Regular maintenance of batteries is must.
11. Stacking of wastage in control panel room should be avoided.
12. UPS batteries & generator battery please be recycled properly. Regular maintenance of batteries is must to improve healthy condition of the computer peripherals.
13. Institution name board be illuminated using 50W LED (at least Two Nos.) flood lights

Annexure & references

- 1) Energy data sheets submitted by the institute.
- 2) Bills & other Certifications submitted by institute in connection with Energy Audit.

Energy Audit Certificate

This is to certify that **Shri Swami Vivekananda Shikshan Sanstha, Kolhapur's Kakasaheb Chavan College, Talmavale Tal. Patan, Dist. Satara – 415103** has conducted preliminary Energy Audit of their campus. The energy activities & measures carried out by the institute have been physically varied on 05/10/2023.

The detail findings, conclusions & recommendations are annexed separately in the energy audit report.

Some of the energy conservations opportunities have been identified by the institute & some of the energy conservations & saving opportunities are suggested.

The positive attitude of the institute towards energy, environment & sustainability is appreciable

Green Audit Report

A green audit, also known as an environmental audit or sustainability audit, is like a health checkup for organizations to assess their environmental impact. It involves evaluating practices, processes, and policies to identify areas where they can be more eco-friendly. The goal is to promote sustainability and reduce the organization's carbon footprint. It's like giving Mother Earth a progress report

In an era marked by increasing environmental consciousness, the concept of a green audit has emerged as a powerful tool for organizations to assess and enhance their ecological footprint. This introspective examination is not merely a bureaucratic exercise but a transformative journey towards sustainability, echoing a commitment to harmonize business practices with the delicate rhythms of the natural world.

The term "green audit" may resonate differently depending on the context, but at its core, it encapsulates a systematic evaluation of an organization's activities, processes, and impacts on the environment. This process is akin to holding up a mirror to the inner workings of an entity, scrutinizing its ecological choices, and probing the sustainability of its operations. Imagine it as an environmental health check-up for organizations, where the objective is not just to identify ailments but to prescribe remedies for a healthier, more sustainable future.

The urgency for green audits is underscored by the escalating environmental challenges confronting our planet. From climate change and resource depletion to biodiversity loss, the ecological stakes have never been higher. In this milieu, organizations are increasingly recognizing that their actions reverberate far beyond profit margins; they resonate within the ecosystems that sustain life on Earth. A green audit, therefore, becomes a strategic imperative—a compass guiding businesses towards practices that are both economically sound and ecologically responsible.

As we delve into the intricate layers of a green audit, it is crucial to understand its broader implications. This is not a mere checklist exercise; it's a profound commitment to accountability and transparency. The audit encompasses a spectrum of environmental aspects, ranging from energy consumption and waste generation to water usage and emissions. It demands a nuanced understanding of an organization's interconnectedness with the environment and challenges conventional notions of success that hinge solely on financial metrics.

The genesis of a green audit lies in the acknowledgment that sustainability is not a fringe agenda but an integral facet of long-term viability. It necessitates a departure from the linear, extractive models of the past towards circular, regenerative frameworks. The audit process, therefore, becomes a narrative—an organization's story told through the lens of its impact on the environment. It invites reflection on the choices made, the resources consumed, and the waste generated in the pursuit of its mission.

The benefits of a green audit extend beyond a mere eco-friendly image. While enhancing environmental performance is a cornerstone, the ripple effects touch various facets of organizational function. Operational efficiency often witnesses an upswing as resource optimization becomes a focal point. Cost savings materialize through energy efficiency measures, waste reduction strategies, and the adoption of sustainable practices. Moreover, a positive environmental reputation can bolster brand value, appealing to a consumer base increasingly attuned to ethical considerations.

In conclusion, the green audit is a gateway to a future where business and the environment coexist synergistically. It is a call to reimagine success, where prosperity is not measured in isolation from environmental well-being. As organizations traverse this path of introspection, they not only future-proof their operations but also contribute to a global paradigm shift towards a more sustainable and harmonious world. The green audit is not a journey of compliance; it is a voyage of transformation—one where organizations evolve from being mere actors in the economy to stewards of the planet.

Audit objectives and scope

The primary goal of the green audit within the college campus is to champion Environment Management and Conservation. It serves as a compass guiding the institution towards a sustainable future, not just meeting regulatory requirements but actively contributing to environmental well-being. Let's unpack the main objectives of this Green Audit:

- **Introducing and Raising Awareness:**

The audit seeks to enlighten and sensitize students to the real concerns surrounding the environment and its sustainability. It's about instigating a sense of environmental responsibility and mindfulness among the future custodians of our planet.

- **Securing the Environment and Human Health:**

By delving into the patterns and extents of resource use on campus, the audit aims to mitigate threats to human health. Identifying potential hazards and devising strategies to curtail them ensures a safer and healthier living and learning environment for all.

- **Establishing Baseline Data for Future Sustainability:**

Creating a baseline data set is akin to setting a benchmark for future sustainability endeavors. It's a strategic move to avoid disruptions that may be harder to address in the future and could potentially come at a high cost. This proactive approach ensures a smoother path towards long-term environmental resilience.

- **Developing Environmental Ethics in Young People:**

Beyond the quantitative aspects, the green audit aspires to cultivate an environmental ethic and value systems in the college's young demographic. It's not just about compliance; it's about fostering a deep-seated understanding of the interconnectedness between human actions and environmental outcomes.

- **Improving Environmental Standards:**

The audit acts as a catalyst for raising the bar in environmental standards. By identifying areas for improvement, the institution can implement measures that go beyond mere compliance, setting a precedent for sustainable practices that others may follow.

- **Benchmarking Environmental Protection Initiatives:**

The green audit serves as a tool for benchmarking environmental protection initiatives. It provides a yardstick against which the effectiveness of various measures can be measured, facilitating continuous improvement and innovation in sustainability practices.

- **Enhancing College Profile:**

Beyond the tangible environmental benefits, the green audit contributes to enhancing the college's profile. A commitment to sustainability resonates positively with stakeholders, potentially attracting environmentally conscious students, faculty, and partners. It's a statement of the institution's values and its dedication to being a responsible member of the global community.

In essence, the green audit is not a mere checklist; it's a dynamic process that aligns the college with the principles of environmental stewardship. It's a journey towards a sustainable future, where the campus becomes a living testament to the harmonious coexistence of educational pursuits and ecological well-being

Which of the following are available in your institute?

Sr.No.	Area	Status
1	Garden area	Available
2	Play ground	Available
3	Kitchen	Available

9	Guest House	Available

Which of the following are found near your institute?

Sr.No.	Points Considered	Status
1	Municipal dump yard	Not in vicinity of institute
2	Garbage heap	No Garbage heaps
3	Public convenience	Yes
4	Sewer line	Not in vicinity of institute
5	Stagnant water	No
6	Open drainage	No
7	Industry – (Mention the type)	No
8	Bus	Yes
9	Public halls	Not in vicinity of institute

1. Solid Waste Management

Solid waste management is all about handling and disposing of solid waste in an environmentally responsible manner. It's like playing the cleanup crew for our living spaces. This process involves collection, transportation, disposal, and recycling or treatment of solid waste to minimize its environmental impact. The aim is to keep our surroundings clean, prevent pollution, and make the most out of our waste by turning it into something useful, like compost or recycled materials. So, in a nutshell, it's about giving our garbage a second chance at being something good

Solid waste management is a critical aspect of environmental stewardship and sustainable living. As our population continues to grow, so does the amount of waste we generate. Proper management of solid waste is essential to mitigate the environmental impact and promote a healthier, cleaner world for current and future generations.

Solid waste encompasses a wide range of materials, including household waste, industrial byproducts, and commercial waste. Effectively managing this diverse array of waste involves a comprehensive approach that includes collection, transportation, disposal, recycling, and waste reduction strategies

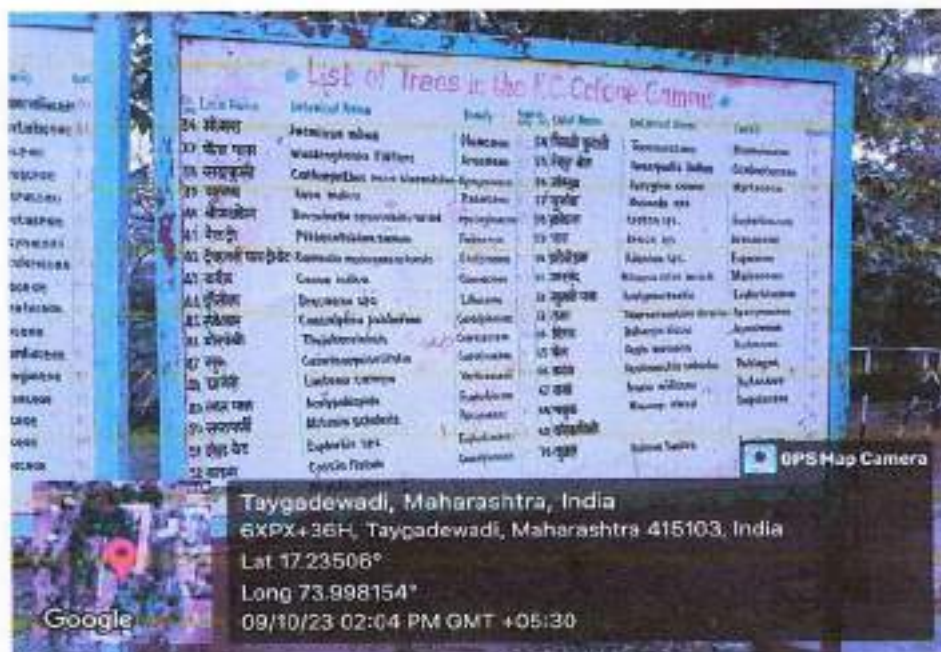

Solid waste, Canteen waste, paper waste, plastic waste, toiletry waste, Horticulture Waste, etc. are generated in college campus

Which is collected in waste collection bins which are placed in canteen porch classrooms etc. A waste store yard is observed for the horticultural waste whereas the other dry waste including E-waste were sold to Aniket Trading Company

2. Greening the campus

Greening the campus is like giving Mother Nature a front-row seat in the academic theater. It's about transforming the college environment into a hub of sustainability, where every corner whispers a story of ecological responsibility. From landscaping to energy consumption

3. Water Management

The rain water harvesting is installed and water is discharged into the ground to recharge the ground water table with proper treatment by providing sand bed as filter media. Two units of rain water harvesting are constructed in college campus.

The Sources of water for college is well water. The water is transported from river to storage tank. The bore well water is treated using filtration before drinking. And for other use it is used directly. The water meter is not installed. The reuse and recycle of used water is not carried out in college campus and the used water is directly discharged into the ground.

The sewage is separately collected by pipeline which is attached to sewerage line of Municipal Council.

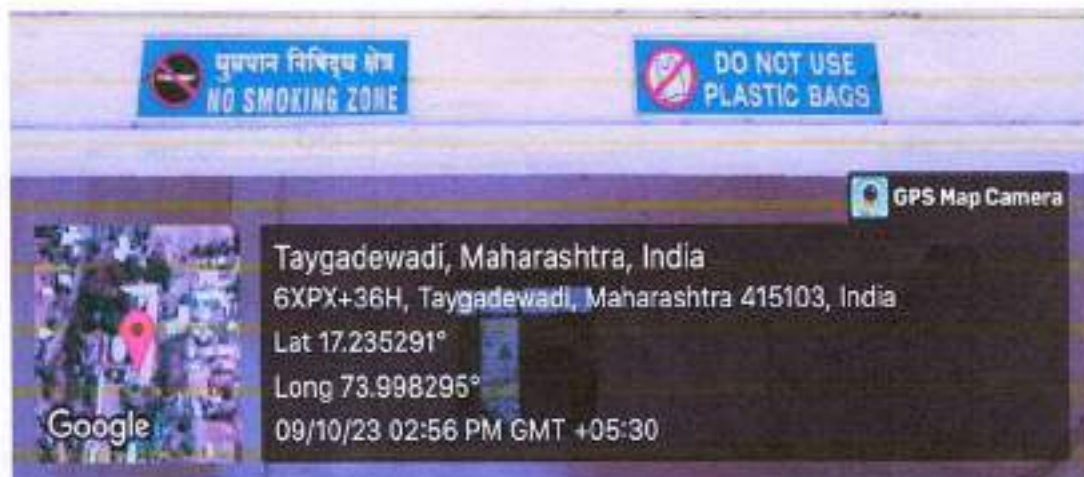

4. Health and Safety

Safety against fire hazard is properly managed by providing well set up of fire extinguisher at various location which include library porch and laboratories. Along with this first aid kit is also kept in institute. Notice or board displayed showing the smoking is strictly prohibited in college campus

5. Environmental legislative compliance

They have banned single use plastic. Their environment policy includes awareness, and environmental conservation efforts through Green Society.

6. Photographic Gallery showing Various Activities related with Environment

Major Positive Points Observed in Institute

1. Solid waste generated in Institute is properly managed
2. Rain water is harvested with proper treatment
3. Health and Safety of Faculty and Students is Considered and provisions for same is provided.
4. Important Days Like World Environment Day, Earth Day, and Ozone Day etc. are celebrate in Campus
5. Institute participated in National and Local Environmental Protection Movement
6. Periodically pollution reduction, plantation, energy conservation awareness campaigns carried out by institute

Major suggestions given to the institute

1. Conduct Water and Wastewater Quality monitoring by the Institute
2. Electricity can be saved by use of LED bulbs for illumination
3. Provide Alternate source of energy i.e. Solar Panel
4. Environment Policy to be adopted by the College Campus and it should be displayed
5. Water Meter should be installed and maintain the inventory of ground water extraction resource bore well.
