

### **2.3.2 The ICT enabled tools for effective teaching-learning process:**

In order to enhance teaching-learning experience, the College continuously strives to strengthen Information and Communication Technology. For this, the College has developed digital infrastructure that comprises of Computers, Laptops, Printers, High Speed Scanners, Projectors, Photocopier Machines, Pen Drives etc. Teachers use these ICT enabled tools and online resources for effective teaching and learning process. They share reading resources, assignments and self-study materials for promoting independent learning. Along with this, the teachers also use departmental blogs, Whatsapp Groups, Google spreadsheets, various applications for online teaching viz. Zoom, Google Meet etc.

The College's library has subscription of numerous e-journals. These resources are made available to the students and faculty members. In addition to this, teachers also use PPTs, Video clippings and online resources in order to provide the students advanced knowledge and practical learning. The classrooms are furnished with LCD projectors. The College has state-of-the-art Wi-Fi enabled ICT laboratory for students and faculty members. The announcements and news related to the academics are hosted on the College's Website.
